RPM - Management Team - Minor Hockey Association Player & Coach Development 2012-2013 Only

Bringing safe and sustainable services to Minor Hockey

Why hire one paid development coach when you can have a team of professionals each specialists working together to support your association. Minor Hockey Associations are realizing quickly a paid development position is not a one person job in fact few individuals possess the skill sets necessary to provide player and coach development at every level within an association. With large numbers, duplication of practise times and locations its very difficult for one person to manage. Not to mention your need for clarity, consistency, dependability and accountability! RPM has a team of professionals along with a supporting cast of professional instructors available to assist and support your association.

Meet our Management Team - assigned to your association! 6 Professionals working for you!

Start your 2012 Hockey Season with Player & Coach Development! The RPM Difference...Skill based instruction vs Drill based

The fundamental difference between RPM and other current commercial providers is RPM is a skill based company. RPM focuses on the technical aspects of all hockey skills and in particular the bio-mechanics required to perform each skill. If winning hockey is a bi-product of tactical play, then tactical play is a bi-product of individual skill and individual skill is a bi-product of the bio-mechanics required to perform a given skill.

All flash & no substance - Drill based providers focus on the drills itself with little or no technical instruction, no progressions, no details.... drills are selected as a means to fill a practice rather than focus on specific technical skill development. What is it they are actually teaching? or are they just running players thru drills? There is a reason why RPM has been around for 30 year's competitor's come and go and RPM continues to do what we do best teach the technical skills and work with association coaches.
